

Helpful Hints

For Keystroke POS

THE CLEAR CHOICE IN RETAIL AUTOMATION

February 2007

Volume 4

Welcome to Helpful Hints for Keystroke POS, a monthly communication from Specialized Business Solutions.

Hints

- Do you want to identify items by more than one product code? Use Alternate Inventory Codes (on the Inventory Database record) to enter other codes for that item.
- Time is very important to you and to Keystroke POS. Make sure the clocks on all your computers are set correctly.

Database Manager

You can easily copy information from an existing database record to a new one.

- First, go to the record you want to copy from.
- Then select Record and Add from the top menu to go to a new, blank record.
- Press  to copy an individual field or  to copy the entire record.

New & Improved

Keystroke POS v6.12 is now available! We've added dozens of improvements and you're eligible for a free update if you are on a current software maintenance plan.

To share a **Helpful Hint** or success story of your own, email us at HelpfulHints@KeystrokePOS.com or call 800-275-4727.
