# MultiStore Polling with pcANYWHERE

.....

## Version 8.x

This document contains a listing of files used for Automated Polling using pcANYWHERE32 version 8.x for Windows 95/98 by Symantec. These files are contained in the file MRGPCAW8.ZIP, located in your **Keystroke** program directory.

### Terms:

#### **Master**

The location of the computer (or network) where all data files are stored. This is where the Consolidated Data directory (DATA\ ) and the sub-directories (STORE1\ & STORE2\ ) will be located.

#### **Remote**

The physical store located at a different location than the Master.

---

**NOTE:** *pcANYWHERE32 refers to the Remote location as the HOST, which differs from our use here.*

---

### Contents of the File MRGPCAW8.ZIP

**CHKSTAMP.BAT** – File used to verify valid files at the remote locations. Place this file in the \KEYSTROK\ directory at each remote.

**EXT.BAT** – File used to run EXTRACT.EXE at each remote location. Place this file in the \KEYSTROK\ directory at each remote.

**EXTRACT1.SCR** – pcANYWHERE32 Script file called by MERGEAW.BAT for store #1. Place this file in the ..\PCANYW~1\DATA\ directory at the Master location.

**EXTRACT1.SCX** – File used by pcANYWHERE32. Place this file in the ..\PCANYW~1\DATA\ directory at the Master location.

**EXTRACT2.SCR** – pcANYWHERE32 Script file called by MERGEAW.BAT and MERGEAW1.BAT for store #2. Place this file in the ..\PCANYW~1\DATA\ directory at the Master location.

**EXTRACT2.SCX** – File used by pcANYWHERE32. Place this file in the ..\PCANYW~1\DATA\ directory at the Master location.

**MERGEAW.BAT** – Master Control File for 2 REMOTE location, runs the pcANYWHERE32 and Keystroke executables (.EXE files). Place this file in the \KEYSTROK\ directory at the Master location.

**MERGEAW1.BAT** – Master Control File for 1 REMOTE location, runs the pcANYWHERE32 and Keystroke executables (.EXE files). Place this file in the \KEYSTROK\ directory at the Master location.

**MRGPCAW8.TXT** – This document in text(.txt) file format.

**SEND1.SCR** – pcANYWHERE32 Script file called by MERGEAW.BAT for store #1. Place this file in the ..\PCANYW~1\DATA\ directory at the Master location.

**SEND1.SCX** – File used by pcANYWHERE32. Place this file in the ..\PCANYW~1\DATA\ directory at the Master location.

**SEND2.SCR** – pcANYWHERE32 Script file called by MERGEAW.BAT and MERGEAW1.BAT for store #2. Place this file in the ..\PCANYW~1\DATA\ directory at the Master location.

**SEND2.SCX** – File used by pcANYWHERE32. Place this file in the ..\PCANYW~1\DATA\ directory at the Master location.

## **Notes:**

1. The following directories need to be created:

\KEYSTROK\STORE1\HOLD\ at the Master location.

\KEYSTROK\STORE2\HOLD\ at the Master location.

\KEYSTROK\DATA\HOLD\ at each Remote.

2. If Store#1 is at the same location as the Master (you are using MERGEAW1.BAT), live sales for this store will be saved in the \STORE1\ data directory. This requires using the /D STORE1 startup switch when starting Keystroke.

---

**NOTE:** For complete instructions for setting up the **Keystroke MultiStore** module, refer to the **Keystroke POS MultiStore Appendix**.
