

### ***New On-Screen Toolbars & Macros***

- New Keystroke Toolbars provide added functionality and flexibility throughout the system, with instant benefits of faster training and improved POS efficiency.
- Standard Toolbars include a variety of user-definable sales and payment buttons, a traditional numpad, and a full QWERTY keyboard which toggles on/off as needed.
- Toolbar design and layout is stored in XML file format for maximum control and configurability. An easy to use pop-up Button Editor allows you or your dealer to customize Toolbars to suit your unique business needs.

### ***Improved User-Interface & New Extended Capabilities***

- Tighter adherence to Windows® XP/Vista user-interface standards for improved appearance and menu controls.
- Sub-windows/dialog boxes now utilize Windows Display Properties (Themes and Color Schemes), and are moveable with sticky placement.
- A new modifiable “Extensions” menu enables better integration with SBS and 3<sup>rd</sup> party add-ons. Contact your local Authorized Dealer to learn more about powerful new Extensions available now and coming soon!

***Move up to the newest & best retail technology today!***  
***Keystroke POS v6.20***

THE CLEAR CHOICE IN RETAIL AUTOMATION

# Keystroke™ Point Of Sale

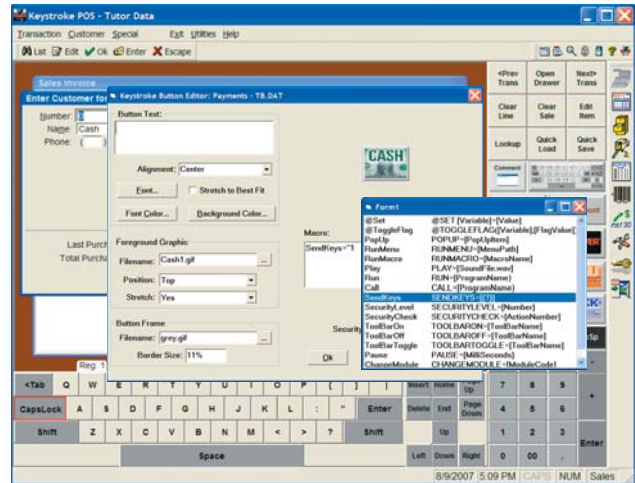

## Version 6.20 Enhancements

### Powerful New Macro Engine

- Macros save time and simplify repetitive input such as typing comments or performing complex tasks.
- Create Macros with basic text or use direct call commands to access hundreds of program features.
- Activate Macros using key combinations, Scripts, Toolbar Buttons, programmable keyboards, or other programs.

### Updated Security & Data Controls

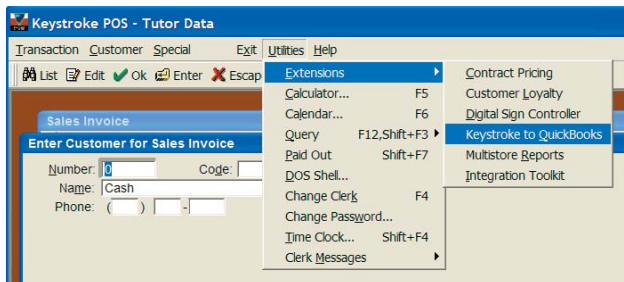

- New Security Feed feature integrates live transaction data to external security monitoring and digital recording systems (DVR).
- Improved Serial Number handling on sales transactions, purchases, variances, rentals, and store transfers.

Easy to use Button Editor allows you to configure Toolbars to make learning easier and completing sales faster!

### Improved Payment Processing Integration

- Keystroke POS v6.20 continues to comply with the Payment Card Industry (PCI) data security standards for risk management and fraud prevention.
- Automatic reminder prompt to purge historical credit card payment data. External Gift Card Trigger support.
- To learn more about the PCI guidelines or to apply for a low-cost merchant account with FREE Gift Card processing, call Mercury Payment Systems at **800-846-4472** or visit [www.MercuryPay.com](http://www.MercuryPay.com).

### New Extension Add-ons – Coming Soon!

- A variety of new add-on Extension programs developed by SBS and 3<sup>rd</sup>-Party programmers will be announced this fall. Watch for email announcements or contact your local Authorized Keystroke Dealer.
- E-Commerce Integration, Customer Loyalty, Digital Sign Controller, Portable Data Capture, and more!

### Many Other Valuable New Features

- New Alternate Codes on Customers and Vendors.
- Easier Software Update Patches are now delivered as executable programs to simplify the installation process.
- New graphics printing on forms.  
(Note: Most applications will require custom form modifications to utilize this new capability.)

**The Version 6.20 software update is available free to active Software Maintenance plan subscribers. To order Keystroke POS v6.20, call SBS or contact your local Authorized Keystroke POS Dealer!**
